

# Sprint 2 - Retrospective

The estimation was better than last week and overall good. We need to work on asking for help with coding and saying that we have some more time to code. Our discussions on how to solve problems has been really good and extensive.

Project owner and Scrum master doesn't have a function in this team, as we are able to communicate and make decisions together on a minute based latency. Scrum masters only function, thus far, is to book a group room and bring fika on fridays. Project owner has been taken over by the group. We feel that it's works as is, so we are going to continue this way.
