User Manual

The first time you open the application after a fresh installation, you will need to enter a nickname. Then you will come to the menu.

Menu

The menu have four different buttons that you can press:
- Play: takes you to the bus connection activity.
- High Score: takes you to the high score.
- Tutorial: takes you to the tutorial.
- Exit: exits the application.

Bus Connection Activity

If the application have found a bus to connect to, it will be a start button that starts the game once clicked. Otherwise the button have the text connect, that on each click tries to connect to a bus. The button is disabled while searching for a bus.

High Score

Shows a list of the current highest scores.

Tutorial

The tutorial have information about how to play the game. To change page, press the button next or back. If on the first page pressing back you will be return to the menu, same for pressing finish at the last page.

Game

(same text as the tutorial contains)
The goal of the game is to aline three tiles of the same color in a row or a column. In order to do so, first click on a tile and then click an adjacent tile to swap them (You can't swap diagonally). Once three of the same kind are aligned they will be replaced by new tiles and you will get score. When the stop button lights up in the bus, you should as fast as possible press the bonus button. By doing so you will get a score multiplier. The game is over when the bus arrives at a bus stop. If your score is high enough it will be saved to the high score.
